Overview of the Federal Reserve System

• The “Fed” consists of three main entities:
  • Board of Governors: 7 members appointed by U.S. President
  • Federal Reserve Banks: 12 total; semi-independent by design
  • Federal Open Market Committee: 19 members; 12 voting

• As with most central banks, the Fed’s primary responsibilities fall within four general areas:
  • Lender of last resort – provide liquidity in times of crisis
  • Monetary policy – promote full employment and low inflation
  • Bank regulation – ensure safety and soundness of banks
  • Financial services – bank for banks, bank for federal govt.
Federal Reserve Districts and Office Locations
The Oklahoma City Branch of the Federal Reserve Bank of Kansas City

At its June meeting the FOMC forecast U.S. unemployment to come down only slowly.
And for inflation pressures to ease after rising with oil and food prices in 2011.
The Fed’s balance sheet has tripled in size, and the fed funds rate remains near zero.

*Only contains one week of data*

Source: Federal Reserve Board
“To support a stronger economic recovery and to help ensure that inflation, over time, is at levels consistent with the dual mandate, the Committee decided today to extend the average maturity of its holdings of securities. The Committee intends to purchase, by the end of June 2012, $400 billion of Treasury securities with remaining maturities of 6 years to 30 years and to sell an equal amount of Treasury securities with remaining maturities of 3 years or less. This program should put downward pressure on longer-term interest rates and help make broader financial conditions more accommodative….

“To help support conditions in mortgage markets, the Committee will [also] now reinvest principal payments from its holdings of agency debt and agency mortgage-backed securities in agency mortgage-backed securities. In addition, the Committee will maintain its existing policy of rolling over maturing Treasury securities at auction. The Committee also decided to keep the target range for the federal funds rate at 0 to 1/4 percent and currently anticipates that economic conditions—including low rates of resource utilization and a subdued outlook for inflation over the medium run—are likely to warrant exceptionally low levels for the federal funds rate at least through mid-2013…

“Voting against the action were: Richard W. Fisher [Dallas Fed pres.], Narayana Kocherlakota [Minneapolis Fed pres.], and Charles I. Plosser [Philadelphia Fed pres.], who did not support additional policy accommodations at this time.”
The Oklahoma Economy

- Review of recent economic data
- Closer look at labor and energy
Oklahoma had a much milder recession, and has recently been adding jobs rapidly.

Payroll Employment

Year-over-year percent change

As always, energy prices are Oklahoma’s biggest risk relative to nation.
Summary

- The U.S. economy is facing some headwinds following only modest expansion in the first half of 2011.

- Oklahoma’s growth has been more solid, and fundamentals remain better in the state than the nation.
