The National and Southern Economic Outlooks

Presentation to the:
Fiscal Affairs and Government Operations Committee
of the Southern Legislative Conference

July 12, 2008

Chad Wilkerson
Vice President & Branch Executive
Federal Reserve Bank of Kansas City, Oklahoma City Branch
Federal Reserve Districts and Office Locations
Purposes and Structure of
the Federal Reserve System

• The overall purposes of the Fed are to promote:
  • National financial stability
  • Maximum sustainable economic growth/employment
  • Low and stable inflation

• We do this through our 3 primary mission areas:
  • Monetary policy – most visible role to the public, usually
  • Bank regulation – including lender of last resort
  • Payments processing – cash, checks, electronic payments

• Monetary policy is set by the 12-member FOMC:
  • The Federal Open Market Committee meets every 6 weeks
  • Voting members consist of:
    • the 7 Governors in Washington, including Chairman Bernanke;
    • the New York Fed President, Timothy Geithner; and
    • 4 of the 11 other Fed presidents on a rotating basis
The Federal Open Market Committee decided today to keep its target for the federal funds rate at 2 percent.

The substantial easing of monetary policy to date, combined with ongoing measures to foster market liquidity, should help to promote moderate growth over time. Although downside risks to growth remain, they appear to have diminished somewhat, and the upside risks to inflation and inflation expectations have increased.

June 25, 2008
The U.S. Economic Outlook

- U.S. economic growth is below average
- Financial and credit markets remain stressed
- Inflation pressures are rising
- But forecasts call for improvement by 2009
Real GDP growth has been well below average since last fall, driven by housing.

Growth in Components of Real GDP

Percent change from the previous period

- Total GDP
- Consumer spending
- Residential investment
- Business investment
- Exports
- Government spending

Second quarter data suggest the sluggishness continues, but no further deterioration.

Several risks to U.S. growth remain

- Concerning trends since the end of 2007
  - Oil prices up 61% through yesterday
  - U.S. home prices down 8% through May
  - S&P 500 down 16% through yesterday

- More recently, credit spreads have begun to widen again, after improving since March
But forecasts call for a rebound in national economic growth in 2009.

The Outlook for Southern States

- Southern economic growth has outpaced the nation in recent years, but has now slowed

- Housing difficulties are hitting some Southern states hard, but not all are suffering equally

- The outlook for the South remains moderately positive, with boosts from exports and energy
Job growth in the South has outpaced the rest of the nation since the 2001 recession.

Source: U.S. Bureau of Labor Statistics
Energy states are still growing, but job gains are sluggish or negative in most other states.
Home prices are declining in most Southern states, but with wide variation.
Foreclosure rates are rising, but only two Southern states are worse than the nation.

Foreclosure Rates in Southern States
Quarterly Average

Households per foreclosure
