The Fed and the Economy in the U.S. and Oklahoma

Chad Wilkerson
Vice President, Economist, and Oklahoma City Branch Executive
Purposes and Structure of the Federal Reserve System

• Overall purposes of the Fed are to promote:
  • Low and stable inflation
  • Maximum sustainable employment
  • National financial stability (in conjunction with others)

• The primary functional areas of the Fed are:
  • Monetary policy – controls nation’s money supply; lender of last resort
  • Bank regulation – all bank holding companies; state Fed member banks
  • Payments systems – cash; electronic; bank for federal government

• The Federal Reserve System consists of:
  • Board of Governors: 7 members appointed by Senate to 14-year terms.
  • Federal Reserve Banks: 12 Banks, each serving a unique district.
  • Federal Open Market Committee (FOMC): 12 voting members
Federal Reserve Districts and Office Locations
The Oklahoma City Branch Office of the Federal Reserve Bank of Kansas City

- **Staff and functions**
  - Approximately 35 full-time staff involved in economic research; bank examinations; and public and community affairs

- **2010 board of directors**
  - Steve Agee (chairman), President, Agee Energy, and Professor, OCU, OKC
  - Bill Anoatubby, Governor, Chickasaw Nation, Ada
  - Jim Dunn, Chairman, Mill Creek Lumber & Supply Co., Tulsa
  - Jacque Fiegel, Senior EVP & COO, Coppermark Bank, OKC
  - Rose Washington Rentie, Executive Director, TEDC Creative Capital, Tulsa
  - Doug Tippens, President and CEO, Bank of Commerce, Yukon
  - K. Vasudevan, Chairman, Service and Technology Corp., Bartlesville
The U.S. Economy

- The U.S. economy is growing again, with help from monetary and fiscal stimulus.
- But the strength of recovery is likely to be modest, due to a number of factors.
- With modest growth, inflation is expected to remain tame in the near term.
Third quarter GDP growth was finally positive, but was boosted by government stimulus.

Growth in Components of GDP

- Total GDP
- Consumer spending
- Residential investment
- Business investment
- Exports
- Government spending

Percent change from the previous period

The Fed’s balance sheet is much larger than before the crisis
The Oklahoma Economy

- As usual in recessions, Oklahoma entered this recession later than the nation.

- After steep declines for much of 2009, the state is showing early signs of recovery.

- But some risks remain, including the future path of energy prices.
Oklahoma usually enters recessions late but leaves around the same time as the nation

**Average Recession Path, 1956-2006**
Employment level 4 quarters before and 8 quarters after U.S. jobs peak

Oklahoma entered this recession 3 quarters late and appears to be leaving 1 quarter late.
Manufacturing indexes for the state show similar signs of recent recovery

Source: ISM, FRBKC Manufacturing Survey
And importantly, the rig count is rising again after falling dramatically in 2009.
Unlike the nation, home prices have held up quite well in Oklahoma, and are stabilizing.

Source: OFHEO
Agricultural conditions in the state remain rather weak, but also may have bottomed.
So unemployment in Oklahoma remains much lower than in the nation.

Plus, our region and state are receiving slightly more fiscal stimulus than the nation.
Energy prices remain the primary risk, but natural gas has recently turned back up.

The U.S. economy is growing again, but recovery is expected to be modest.

Oklahoma is also showing some early signs of recovery, and fiscal stimulus is kicking in.

Still, the future path of energy prices remains a risk for later in the year.
