The recovery is underway.

- Consumers are spending.
- Job openings are up and firms are investing in equipment and software.
- Federal governments are spending, with contractions at the state and local levels.
- Exports are rising, but imports rose faster last summer.

What are the effects of quantitative easing?

- The yield curve steepened between June and November, but rates are now rising.
- What are the side effects?

Success will be determined by the exit strategy.
