

Erik Haug

Vice President, Energy Marketing
Apex Clean Energy

Erik Haug leads Apex's Energy Marketing team focused on utility-scale renewable energy offtake with corporate, utility, municipal and government customers.

Since joining Apex in 2015, Haug has successfully built relationships with dozens of leading corporations, universities and cities, resulting in the execution of more than four gigawatts of power purchase agreements to support utility scale wind and solar projects in the United States.

Previously, Haug held positions as an exploration and development geologist and a commercial advisor for ExxonMobil, with responsibilities for market analysis, negotiations and transactions, and commercial business intelligence.

His research on landscape evolution driven by hyper-arid climate is published in the journal *Geomorphology*.

Haug holds a BS in geology with environmental concentration from the College of William and Mary and an MS in geosciences from Virginia Tech.
