Learning through Lending: Kids as Angel Investors

Most kids don’t have a clue about investments and their importance to overall financial health. A few may have heard of investing in the stock market, but their knowledge is generally limited. So how can we introduce the concept of investing in a way that engages kids’ interest and promotes interactive experiences? I suggest sharing the concept of angel investing and encouraging them to actively participate as “angels” who invest in business startups of Third-World entrepreneurs.

Since kids don’t have the capital to make large investments, they can become angel investors of another sort. By sponsoring microloans to Third-World entrepreneurs for use in starting small businesses, kids can truly make a difference in the lives of others by helping them become self-sufficient.

A great way to introduce microlending to younger kids is by sharing the book One Hen: How One Small Loan Made a Big Difference by Kate Smith Milway. The book tells the story of a boy from Ghana named Kojo who buys one hen, which in turn lays eggs and hatches more hens, until he becomes the largest chicken farmer in the country. Kojo then begins to help others start their own small businesses. The book is inspired by the true story of Kwaben Darko of Ghana and is motivational to read.

To familiarize kids with the lending process, start by defining “microloan” as a small amount of money lent by an individual (rather than a bank) to a business startup or self-employed person. This small loan helps the entrepreneur buy capital resources, or goods made and used to produce other goods and services. Once these resources are purchased, the entrepreneur can begin to develop their product, such as jewelry, clothing or soap, to sell in the marketplace. Or they may use their loan to buy seeds and fertilizer to grow vegetables, or raise chickens or sheep to sell. Once the entrepreneur’s business becomes successful, they will earn a profit or extra income after paying production costs. The microloan will be repaid to investors through this extra income.

There are a number of websites that match entrepreneurs with microlenders. For example, Kiva (http://www.kiva.org/) is an organization with a mission to alleviate poverty by connecting people through lending. This nonprofit currently has 1.5 million lenders who have loaned $838,000 to entrepreneurs in 84 countries. Anyone can invest and can begin with loans as small as $25. The investor, or microlender, can choose who to lend to by viewing the entrepreneur profiles posted on the website. Once an investor has identified a borrower to support, he or she can decide on an amount to lend. Kiva field partners in the borrower’s country receive that money through wire transfer. The partners disburse the money accordingly and collect repayment to send back to Kiva.

Another nonprofit in this field is Zidisha (https://www.zidisha.org), which is Swahili for “grow or expand.” This microlending community connects lenders and entrepreneurs directly without a “middleman” or field partner. Investors can deposit a microloan amount of one dollar or more in a Zidisha account and receive it back or receive interest on the account. Investors can choose to have their repayment deposited in a PayPal account, use it to fund another entrepreneur, or donate a portion to Kiva to cover operating expenses.

Another nonprofit in this field is Zidisha (https://www.zidisha.org), which is Swahili for “grow or expand.” This microlending community connects lenders and entrepreneurs directly without a “middleman” or field partner. Investors can deposit a microloan amount of one dollar or more in a Zidisha account and receive it back or receive interest on the account. Investors can choose to have their repayment deposited in a PayPal account, use it to fund another entrepreneur, or donate a portion to Kiva to cover operating expenses.

Angel investors are individuals who provide financial backing or seed funding for startups or entrepreneurs in return for ownership equity or debt repayment. Many of these investors are wealthy entrepreneurs or business owners who remember how difficult it was to get their own venture going. Now that these investors are successful, they want to assist others who need financial help in order to reach their entrepreneurial dream.

A great way to introduce microlending to younger kids is by sharing the book One Hen: How One Small Loan Made a Big Difference by Kate Smith Milway. The book tells the story of a boy from Ghana named Kojo who buys one hen, which in turn lays eggs and hatches more hens, until he becomes the largest chicken farmer in the country. “Common Cents: Paying It Forward: Kids as Philanthropists”
This article discusses how to develop philanthropy in kids by introducing them to charitable organizations they can help through donation. For all ages.

Choose a microloan organization and read the profiles to find a borrower who matches your decisions above. Record information on the entrepreneur you choose below.

My Entrepreneur’s Profile:

Name of Borrower: ____________________________

Country: ______________________________________

Small Business Description: ________________________________

Amount Needed for Business: $ ____________________________

Percent Currently Funded: ________________%

Still Needed: $ _______________________

I Loaned: $ _______________ on _____________ (Date)

Make a Difference by Becoming an Angel Investor

Microlending decisions: Answer the questions below to choose which entrepreneur you would like to support.

1. Would you like to help a male or female entrepreneur? Male Female Either

2. Is there a continent or country you would like to support? _______________________

3. What type of small business would you like to focus on?

   - agriculture
   - art
   - clothing
   - food
   - health
   - housing
   - services
   - transportation
   - other _______________________

4. How much would you like to donate? $ _______________________
